We can definitely talk. Reporters are looking into all different areas in Niagara Falls. See below

Niagara Falls International Railway Station slag staging area- Niagara Falls, NY

August 1st at noon will be good, speaking of reporters, I've had TV people knocking on my door along with a lawyer all with in a week. I did not discuss with either. When I get to see you I guess we need to talk about a few things, Thanks [Ex. 6](#)

Hi [Ex. 6](#)

Perfect timing. I was going to call you yesterday but a reporter came by. So busy here.

We were hoping to stop by on the 8th at lunch time to go over soil sampling locations with you. However, our radon guy tried to switch some things around but just told us he couldn't make it for the radon canister drop on the 8th.

How is August 1st for radon drop and August 4th for pickup? We can do at noon or 5 pm. We would want to be consistent with drop and pick up times. So your choice.

Please let me know.

Hi [Ex. 6](#)

I called around 3:30 PM to try and discuss your availability for proposed work. It appears the number I have for your home number is disconnected? ([Ex. 6](#))

Radon Canister Sampling

In looking at the calendar, the best day for the radon canister drop off appears to be July 8th with a pick up on July 11th. We would have to verify availability on Monday with the radon specialist if you are good with those dates. We could do at lunch time or after you return from work (As you know it takes approximately 45 minutes).

Outdoor Soil Sampling

July 8th might also be a good day to perform soil sampling in your yard. You do not need to be present for that outdoor work but we would like your input on pin pointing the sample spots. I have attached a figure with proposed soil sampling points. We would do our best to take the samples in an area that would disrupt the grass the least but we do need to take the samples from the areas where you believe the road used to be. We will set up the utility mark out this upcoming week. Once the mark out is complete, Peter and I could stop by on your lunch break and we can mark out those specific soil sampling points. Please let me know. Thanks

Good Morning [REDACTED] Ex. 6

How are you?

I wanted to see the operating status of your radon system. **Have you hooked up the electric?** We next need to schedule the radon sampling dates (drop and pickup).

Lastly, I would like to continue our discussion with possible soil sampling in your yard. Specifically along the pathway of the old road through your property. **Please let me know when you are available to have a phone call.**

Thanks

Regards,

Eric

Hi [REDACTED] Ex. 6

What phone number would you like us to call you on tomorrow for the 30 minute arrival notification? [REDACTED] Ex. 6 or [REDACTED] Ex. 6 ?

Thanks

Good Morning [REDACTED] Ex. 6

Just a reminder that your radon mitigation system installation is this Wednesday [June 15th in the afternoon](#). It will be an [11am-2pm](#) arrival window. The technician will call at least 30 minutes prior to arriving.

Install should take about 2-3 hours to complete.

Please confirm will be there. Thanks

Regards,

Eric
